

Jason

As we mourn the sudden, tragic death on April 16th of Jason Gruen, a sophomore at Manhasset High School, we rally to support the foundation established in his name.

Jason was a victim of IHSS (Idiopathic Hypertrophic Subaortic Stenosis), a heart disease which frequently affects otherwise healthy young people and all too often results in sudden death in spite of proper diagnosis and medication. At present there is no cure.

The purpose of the Jason F. Gruen Research Foundation is to develop methods to remove the constant threat of arrhythmia and ultimate death of those afflicted with IHSS and further, to identify those at risk.

Contributions in Jason's memory may be sent to:

**The Jason F. Gruen Research Foundation
3145 Camden Lane
Merrick, New York 11566**

Acknowledgement of your tax deductible contribution will be forthcoming.
